

Urinary Continence Preferred Product List – Summary of changes September 2016

Following the recent review and update of the Urinary continence preferred product list, the following table summarises the changes to the formulary.

	Details of Changes
LEG BAGS	Have changed from Coloplast to Qufora in all types and Great Bear for the chambered bag. Unomedical/Convatec remains on both lists
NIGHT DRAINAGE BAGS	Have changed from Clinisupplies to Qufora.
SHEATHS	Bard has remained , Great Bear Libra has been added
CATHETERS	Have remained with Rusch/Teleflex For Open Tipped and silicone: Changed from Coloplast to Qufora. Bardex ic silver catheter has now been included.
VALVES	Have changed from Jade Euro and Bard to Linc Medical and Qufora.
CATHETER BAG SLEEVES	Have changed from Jade to Optimum and Clinisupplies.
RETAINING STRAPS	Have changed from Coloplast and Clinimed to Great Bear and Optimum
FIXATION DEVICES	Now include the Gentle from Optimum.
BLADDER INFUSION KITS	Formulary now includes Bladder Infusion Kits - which means that you can administer catheter maintenance solutions without changing the bag or removing the bag.
VAGINAL DILATORS	Which are generally used by specialist physio's and cath-it kits which include gloves etc. for removal and insertion of a catheter and include the 3 pairs of gloves that is now required for the procedure
