Information Management & Technology	✓		✓
Equality Impact Assessment	✓		✓
Freedom of Information	✓		✓
I confirm that I have considered the implications of this report on each of the matters above, as indicated	✓		

Initials: SH

1. Introduction

- 1.1 The framework provides assurance to the Governing Body of the controls that are in place to mitigate the key risks that could impact on the CCG's delivery of its strategic objectives.
- 1.2 This report provides the current version (Appendix 1) of the Governing Body Assurance Framework (GBAF) for information.
- 1.3 The framework is linked to the Strategic Objectives of the organisation and also serves as a source of external assurance for the NHS England – South (Wessex) quarterly assurance processes.
- 1.4 The Strategic Risks to the organisation have been revised by Directors and added to the Assurance Framework.
- 1.5 The Directors' Performance meeting has operational responsibility for maintaining the Governing Body Assurance Framework (GBAF) with support from the Patient Safety and Risk team.

2. Internal Audit

- 2.1 The annual Review of Assurance Framework and Risk Management, was carried out by TIAA in March 2017. The 2017/18 review was undertaken on 19 February 2018 and the draft and final reports are awaited.
- 2.2 The assurance template for key meetings has been implemented; the template is for completion by committees on a six-monthly basis to demonstrate that they are obtaining the assurances required in accordance with the Terms of Reference and strategic objectives applicable for that committee.
- 2.3 All committee chairs have now completed the assurance template as required and the assurances will be repeated in April 2018, and six monthly thereafter.

3. Gaps in Controls and Assurances

- 3.1 No gaps in assurance are currently identified in the Assurance Framework as at 28 February 2018 and no gaps have been identified since the previous report.
- 3.2 There is currently no specific requirements to develop an assurance framework for the Integrated Care System (ICS) as existing governance arrangements have been confirmed to continue unchanged by NHS England. The ICS is considered a voluntary alignment of decision making which does not 'dilute' or delegate the functions of existing functions of commissioners or providers.

3.3 Additional control requirements may be identified in the light of ongoing changes to the strategic objectives, risks, and further updates and improvements to the structure of the GBAF.

4. Recommendation

4.1 The Governing Body meeting is asked to **note** the Governing Body Assurance Framework format and contents.
