Outcome of equality impact assessment process	N/A
Actions to address impact	N/A
Legal implications	None
Freedom of information	Unrestricted
Public and patient involvement	None required
Current status	N/A
Trend	N/A

1. INTRODUCTION

- 1.1 This report aims to provide a briefing for the CCG governing body members on key issues currently being managed or reviewed.

2. CURRENT ISSUES

- 2.1 **CCG delivery plan 2013-2014** - our delivery plan has now been finalised and a final copy is now available on the our website.
- 2.2 **Five year strategy refresh** - work has started to refresh the CCG five year strategy to reflect further the aspirations and priorities for the CCG. The member's event in July will consider this and a number of stakeholders will be involved in the development of this new strategy which will be available in early 2014.
- 2.3 **Stakeholder engagement** - three extremely successful events have been held over the past two months to engage stakeholders in the work of the CCG and the refresh of the strategy. These events engaged patients and the public as well as local voluntary sector organisations to seek views on the strategic direction of the CCG and to understand local priorities to feed into the refresh of the strategy. All responses will be vital to the further development of our strategy.
- 2.4 **Integration Pioneers Bid** – we have joined with local providers and local authority partners to submit a bid to the Department of Health to seek funding to transform services by joining up both health and social care across the whole system. With full support of the two health and wellbeing boards, this bid, if successful, will see real transformation of services and better outcomes for our residents over the coming years.
- 2.5 **The Transformational Challenge** – we have been working with local authority partners to submit a bid to the Department of Communities and Local Government through its Transformation Challenge Award to provide support for innovations across our three local authorities. The proposal is focussed on the benefits of joint working and integration of the respective councils' adult social care functions with the health sector.
- 2.6 **NHS 111** - we continue to support South West Ambulance Service in the delivery of NHS 111. We are pleased with the progress of our providers and the call centre was featured in an episode of the One Show in May. We have also been proactively working with the local media to raise awareness of NHS 111 and out of hours options, which has featured Dr Patrick Seal.
- 2.7 **The big ask** - working with other NHS partners, we have launched a major research project in Dorset which is gathering public views on local NHS services, via an online and printed questionnaire. The campaign runs for 12 weeks and results will be available in October. The Bournemouth Echo is supporting this campaign by running a series of features in their health section. Dr Chris McCall and Dr Patrick Seal have featured in these interviews so far.

- 2.8 **Health and Wellbeing boards** - both the Dorset and the Bournemouth and Poole Health and Wellbeing Board have met to agree their Health and Wellbeing Strategies. The CCG strategy has also been discussed at these meetings and we are assured that our strategy is supportive of these strategies. The Boards continue to meet on a regular basis with both CCG clinical and management representation on the Board.
- 2.9 **Making Purbeck fit for the future** – the first stage of this project has now been completed with the project board holding the final meeting of this stage in June. A considerable amount of work has been undertaken with key stakeholders to clarify the process and ambitions for this work, models of care and options for the future. The next stage of the project will be to undertake local engagement on options with residents of Purbeck in the autumn.

3. CONCLUSION

- 3.1 These are the matters of interest that I wish to bring to the Board Members attention.

Tim Goodson
Chief Officer
